**Equis Commissions 5.7 MW Solar Project in Aomori Prefecture, Japan**

Tokyo, 23 May, 2017 – Equis Energy (Equis), Asia-Pacific’s largest renewable energy IPP, has commissioned a 5.7 MW solar project in Kamikita City in Aomori Prefecture, Japan.

In Japan, Equis owns 40 projects comprising 0.9 GW and has a further 1.3 GW under development. At its regional headquarters in Tokyo and local offices in Shichinohe, Kasama and Fukushima, Equis employs over 60 professionals well-versed in development, design, project management and investment.

Adam Ballin, Equis Board Director, said, “Renewables represent the future for Japan both economically and environmentally, and Equis is excited about the contribution our new solar plant in Kamikita will make to supporting the community and supplying the country with low-cost, clean solar energy.”

The Enokibayashi project generates 6,840 MWh of energy per annum and on an annual basis, provides 1,297 households with electricity, saves 3,769 tons of CO<sub>2</sub> as well as 6.4 million liters of water.

**About Equis Energy**

Headquartered in Singapore, Equis Energy operates from 15 Asian offices, employing 272 professionals including 100 engineers and 35 local development professionals. Equis is the largest renewable energy IPP in the Asia-Pacific region based on installed capacity and owns 102 renewable energy assets, totaling 4.7 GW across Australia, India, Indonesia, Japan, the Philippines, Taiwan and Thailand. In addition to its current portfolio of 4.7 GW, Equis has a further 71 assets and 6.3 GW under development.
